OUTDOOR PLEASURE

Open Living Collection 2026

Discover Open Living

IT_Progettata per interpretare un modo più fluido e contemporaneo di vivere gli spazi outdoor, la Open Living Collection esplora l'equilibrio tra comfort, versatilità e chiarezza architettonica. Ogni elemento è concepito per adattarsi con naturalezza a contesti residenziali e hospitality, sostenendo uno stile di vita rilassato ma raffinato. Linee pulite, materiali durevoli e proporzioni studiate definiscono un sistema coerente di sedute, in cui le prestazioni incontrano un'eleganza discreta.

EN_Designed to embrace a more fluid and contemporary way of inhabiting outdoor spaces, the Open Living Collection explores the balance between comfort, versatility and architectural clarity. Each piece is conceived to move seamlessly between residential and hospitality settings, supporting a relaxed yet refined lifestyle. Clean silhouettes, durable materials and carefully studied proportions define a cohesive system of seating solutions, where performance meets a quiet, understated elegance.

DE_Die Open Living Collection wurde entwickelt, um eine fließende und zeitgemäße Art des Outdoor-Lebens zu interpretieren, und untersucht das Gleichgewicht zwischen Komfort, Vielseitigkeit und architektonischer Klarheit. Jedes Element ist darauf ausgelegt, sich nahtlos zwischen privaten und Hospitality-Kontexten zu bewegen und einen entspannten, zugleich raffinierten Lebensstil zu unterstützen. Klare Linien, langlebige Materialien und sorgfältig proportionierte Formen definieren ein kohärentes Sitzsystem, in dem Performance auf eine zurückhaltende Eleganz trifft.

FR_Conçue pour accompagner une manière plus fluide et contemporaine d'habiter les espaces extérieurs, la Open Living Collection explore l'équilibre entre confort, polyvalence et clarté architecturale. Chaque élément est pensé pour s'intégrer naturellement aux contextes résidentiels et hospitality, soutenant un art de vivre à la fois détendu et raffiné. Lignes épurées, matériaux durables et proportions étudiées définissent un système cohérent d'assises, où la performance rencontre une élégance discrète.

Roberti®
OUTDOOR PLEASURE

Setai

Definita da volumi generosi e da un profilo basso e accogliente, Setai reinterpreta la seduta outdoor puntando su morbidezza e libertà compositiva. La struttura modulare consente configurazioni flessibili, adattandosi a contesti residenziali intimi e a spazi hospitality più ampi. Gli elementi imbottiti aumentano il comfort mantenendo un'estetica pulita e contemporanea.

Defined by generous volumes and a low, inviting profile, Setai reinterprets outdoor seating through softness and compositional freedom. Its modular structure allows flexible configurations, adapting to both intimate residential settings and larger hospitality environments. Upholstered elements enhance comfort while preserving a clean aesthetic, creating a relaxed yet architecturally grounded system.

Geprägt von großzügigen Volumen und einem niedrigen, einladenden Profil interpretiert Setai das Outdoor-Sitzen neu, mit Fokus auf Weichheit und gestalterische Freiheit. Die modulare Struktur ermöglicht flexible Konfigurationen für private wie größere Hospitality-Bereiche. Gepolsterte Elemente erhöhen den Komfort und bewahren zugleich eine klare, zeitgemäße Ästhetik.

Définie par des volumes généreux et un profil bas et accueillant, Setai réinterprète l'assise outdoor en privilégiant douceur et liberté de composition. Sa structure modulaire permet des configurations flexibles, adaptées aux espaces résidentiels comme aux environnements hospitality. Les éléments rembourrés renforcent le confort tout en conservant une esthétique épurée et contemporaine.

SETAI IS SOFT ARCHITECTURE

Generous volumes and modular forms create flexible compositions shaped by comfort and freedom.

Volumi generosi e forme modulari creano composizioni flessibili, guidate da comfort e libertà.

Venetian

Venetian unisce linee essenziali e una sofisticatezza rilassata, offrendo una soluzione versatile per l'outdoor contemporaneo. La struttura compatta ma confortevole si adatta a contesti privati e contract, dai giardini agli spazi hospitality. L'equilibrio tra volumi pieni e cuscini morbidi definisce una composizione armoniosa, dove funzionalità e chiarezza esprimono un'identità senza tempo.

Venetian combines essential lines with relaxed sophistication, offering a versatile solution for contemporary outdoor living. Its compact yet comfortable structure suits both private and contract settings, from gardens to refined hospitality spaces. The interplay of solid volumes and soft cushions creates a balanced composition, where functionality and clarity define a timeless, understated identity.

Venetian verbindet klare Linien mit entspannter Raffinesse und bietet eine vielseitige Lösung für zeitgemäßes Outdoor-Living. Die kompakte und komfortable Struktur eignet sich für private und Objektbereiche, von Gärten bis zu anspruchsvollen Hospitality-Kontexten. Das Zusammenspiel von festen Volumen und weichen Polstern schafft eine ausgewogene Komposition mit zeitloser, reduzierter Identität.

Venetian associe lignes essentielles et sophistication décontractée, offrant une solution polyvalente pour l'outdoor contemporain. Sa structure compacte et confortable s'adapte aux contextes privés et contract, des jardins aux espaces hospitality. L'équilibre entre volumes pleins et coussins souples crée une composition harmonieuse, où fonctionnalité et clarté expriment une identité intemporelle.

VENETIAN IS QUIET BALANCE

Essential lines and soft volumes define a relaxed, balanced way of living outdoor.

Linee essenziali e volumi morbidi definiscono un modo rilassato ed equilibrato di vivere l'outdoor.

Sunset Harbour

Sunset Harbour evoca apertura e continuità, dove forme lineari e proporzioni equilibrate definiscono una presenza raffinata e accessibile. Il design valorizza leggerezza e ritmo, rendendolo ideale per terrazze, lounge e spazi hospitality. I materiali selezionati garantiscono durata outdoor, mentre la struttura si integra naturalmente in diversi contesti architettonici.

Sunset Harbour evokes openness and continuity, where linear forms and balanced proportions create a refined, approachable presence. The design emphasizes lightness and rhythm, making it ideal for terraces, lounges and hospitality spaces. Carefully selected materials ensure durability outdoors, while its structure integrates naturally into diverse architectural contexts.

Sunset Harbour vermittelt Offenheit und Kontinuität, wobei lineare Formen und ausgewogene Proportionen eine elegante, zugängliche Präsenz schaffen. Das Design betont Leichtigkeit und Rhythmus und eignet sich ideal für Terrassen, Lounges und Hospitality-Bereiche. Sorgfältig ausgewählte Materialien sichern Langlebigkeit und ermöglichen eine natürliche Integration in unterschiedliche architektonische Kontexte.

Sunset Harbour évoque ouverture et continuité, où lignes épurées et proportions équilibrées créent une présence raffinée et accessible. Le design met en valeur légèreté et rythme, idéal pour terrasses, lounges et espaces hospitality. Les matériaux sélectionnés assurent durabilité et permettent une intégration naturelle dans divers contextes architecturaux.

SUNSET HARBOUR IS RHYTHM

Linear forms and balanced proportions shape spaces defined by lightness, rhythm and continuity.

Forme lineari e proporzioni equilibrate definiscono spazi caratterizzati da leggerezza, ritmo e continuità.

Fabrics & Covers

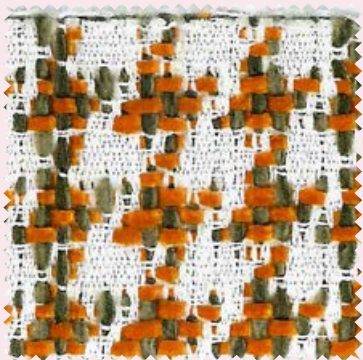

IT_Per queste collezioni è disponibile una selezione esclusiva di tessuti premium outdoor, studiata per valorizzare il design dei prodotti e assicurare un'elevata resistenza agli agenti atmosferici. Tutti i tessuti proposti sono idonei all'uso esterno e presentano un'alta resistenza ai raggi UV, mantenendo nel tempo qualità estetica, comfort e affidabilità. Le categorie tessili disponibili includono tessuti acrilici e soluzioni in polipropilene, poliestere e PVC, abbinate a imbottiture tecniche specifiche per l'outdoor. I rivestimenti sono pensati per offrire protezione, facilità di manutenzione e un elevato livello di comfort. In particolare, i tessuti delle categorie più tecniche garantiscono una quasi totale impermeabilità all'acqua, pur raccomandando una corretta aerazione interna dei cuscini attraverso l'apertura periodica delle cerniere, così da favorire l'asciugatura e prevenire la formazione di muffe. Le collezioni Setai e Sunset Harbour sono realizzate con una struttura in multistrato marino, materiale scelto per la sua stabilità e resistenza in ambienti outdoor. Sedute e schienali sono composti da poliuretano espanso a densità differenziata, abbinato a imbottiture termoleganti, per garantire sostegno, morbidezza e durata. I rivestimenti presentano una speciale spalmatura in PVC impermeabile, antistatica, antibatterica e antiacaro. Le fodere sono completamente sfoderabili, mentre i cuscini liberi sono realizzati in Rollofill H.53, rivestito con PVC impermeabile e traspirante. L'imbottitura tecnica include inoltre Tecnoform HF G450, studiata per offrire elevate prestazioni in termini di comfort e resistenza. La collezione Venetian si distingue invece per una struttura in tubo metallico, trattata con verniciatura a polveri poliestere ed epossidiche, pensata per garantire protezione e durabilità all'esterno. La base è realizzata in compensato marino, mentre i cuscini seduta utilizzano poliuretani espansi di diverse densità, come NIR T 25N e NIR T 30C, combinati con resina termolegata GR 200. I cuscini liberi sono imbottiti in Rollofill e rivestiti con PVC impermeabile e traspirante. La costruzione è completata da componenti antiscivolo, corde in cotone cerato con colorazione reattiva e rivestimenti impermeabili in PVC. Per una migliore protezione dei mobili, Roberti consiglia l'utilizzo delle proprie coperture protettive realizzate in speciale tessuto impermeabile in PVC e poliestere. Le coperture proteggono i prodotti dalle intemperie, dalla polvere e dalle impurità atmosferiche, contribuendo a preservare nel tempo la qualità estetica e funzionale degli arredi. Sono disponibili per una selezione di modelli, come indicato nel listino prezzi. Tutti i prodotti della collezione sono realizzati esclusivamente in Italia, utilizzando imbottiture di origine italiana. Si raccomanda di seguire attentamente le istruzioni riportate nel cartellino qualità "Cura e Manutenzione" fornito con i mobili, così da garantire la massima durata e conservare nel tempo le prestazioni tecniche dei materiali.

EN_An exclusive selection of premium outdoor fabrics is available for these collections, specifically chosen to enhance the design of each product while providing excellent resistance to weather conditions. All fabrics are suitable for outdoor use and offer high UV resistance, preserving their aesthetic qualities, comfort and reliability over time. Available textile categories include acrylic fabrics and solutions in polypropylene, polyester and PVC, combined with technical fillings specifically developed for outdoor applications. These coverings are designed to provide protection, ease of maintenance and a high level of comfort. In particular, the most technical fabric categories offer near-total water impermeability. However, periodic opening of the cushion zippers is recommended to ensure proper internal ventilation, facilitating drying and helping to prevent mould formation. The Setai and Sunset Harbour collections feature a marine plywood structure selected for its stability and resistance in outdoor environments. Seats and backrests are made of differentiated-density polyurethane foam combined with thermobonded padding to ensure support, softness and durability. The covers include a special PVC coating that is waterproof, antistatic, antibacterial and anti-dust mite. Covers are fully removable, while loose cushions are filled with Rollofill H.53 and enclosed in waterproof, breathable PVC. The technical padding also includes Tecnoform HF G450, engineered to deliver high levels of comfort and performance. The Venetian collection features a tubular metal frame treated with polyester and epoxy powder coating to ensure long-lasting protection outdoors. The base is made of marine plywood, while seat cushions use differentiated-density polyurethane foams, including NIR T 25N and NIR T 30C, combined with GR 200 thermobonded resin. Loose cushions are filled with Rollofill and enclosed in waterproof, breathable PVC. The construction is completed with non-slip components, reactive-dyed waxed cotton ropes and waterproof PVC linings. For enhanced protection, Roberti recommends the use of its dedicated protective covers, made from a special waterproof PVC and polyester fabric. These covers protect the furniture from weather, dust and airborne impurities, helping preserve the aesthetic and functional quality of the products over time. They are available for selected models, as indicated in the price list. All products in the collection are exclusively manufactured in Italy using fillings of Italian origin. To ensure maximum durability and preserve the technical performance of the materials, Roberti recommends carefully following the instructions provided in the "Care and Maintenance" quality tag supplied with each product.

DE_Für diese Kollektionen steht eine exklusive Auswahl hochwertiger Outdoor-Stoffe zur Verfügung, die das Design der Produkte unterstreichen und gleichzeitig eine hohe Widerstandsfähigkeit gegenüber Witterungseinflüssen bieten. Alle angebotenen Stoffe sind für den Außenbereich geeignet und verfügen über eine hohe UV-Beständigkeit, sodass sie ihre optische Qualität, ihren Komfort und ihre Zuverlässigkeit dauerhaft bewahren. Das verfügbare Textilsortiment umfasst Acrylstoffe sowie Lösungen aus Polypropylen, Polyester und PVC, kombiniert mit speziell für den Außenbereich entwickelten technischen Polsterungen. Diese Materialien bieten Schutz, Pflegeleichtigkeit und hohen Komfort. Insbesondere die technisch anspruchsvollsten Stoffkategorien gewährleisten eine nahezu vollständige Wasserundurchlässigkeit. Dennoch wird empfohlen, die Reißverschlüsse der Kissen regelmäßig zu öffnen, um eine ausreichende Belüftung zu gewährleisten, das Trocknen zu fördern und Schimmelbildung vorzubeugen. Die Kollektionen Setai und Sunset Harbour verfügen über eine Struktur aus Marine-Sperrholz, das aufgrund seiner Stabilität und Widerstandsfähigkeit für den Außenbereich ausgewählt wurde. Sitz- und Rückenflächen bestehen aus Polyurethanschäum unterschiedlicher Dichte in Kombination mit thermisch verfestigten Polsterungen, um optimalen Halt, Weichheit und Langlebigkeit zu gewährleisten. Die Bezüge sind mit einer speziellen PVC-Beschichtung versehen, die wasserdicht, antistatisch, antibakteriell und milbenhemmend ist. Die Bezüge sind vollständig abnehmbar, während lose Kissen mit Rollofill H.53 gefüllt und mit wasserdichtem, atmungsaktivem PVC umhüllt sind. Zusätzlich kommt Tecnoform HF G450 zum Einsatz, ein technisches Polstermaterial mit besonders hoher Leistungsfähigkeit. Die Venetian Kollektion zeichnet sich durch eine Metallrohrstruktur mit Polyester- und Epoxid-Pulverbeschichtung aus, die optimalen Schutz und hohe Langlebigkeit im Außenbereich gewährleistet. Die Basis besteht aus Marine-Sperrholz, während die Sitzkissen mit Polyurethanschäumen unterschiedlicher Dichte, darunter NIR T 25N und NIR T 30C, sowie GR 200 Thermoharz gefertigt werden. Lose Kissen sind mit Rollofill gefüllt und mit wasserdichtem, atmungsaktivem PVC versehen. Ergänzt wird die Konstruktion durch rutschfeste Elemente, reaktiv gefärbte gewachste Baumwollseile und wasserdichte PVC-Beschichtungen. Für zusätzlichen Schutz empfiehlt Roberti die Verwendung der speziell entwickelten Schutzhüllen aus wasserdichtem PVC- und Polyestergerewebe. Diese schützen die Möbel vor Witterungseinflüssen, Staub und atmosphärischen Verunreinigungen und tragen dazu bei, die ästhetische und funktionale Qualität der Produkte langfristig zu bewahren. Sie sind für ausgewählte Modelle erhältlich, wie in der Preisliste angegeben. Alle Produkte der Kollektion werden ausschließlich in Italien hergestellt und mit Polstermaterialien italienischer Herkunft gefertigt. Um maximale Langlebigkeit und den Erhalt der technischen Eigenschaften zu gewährleisten, empfiehlt Roberti, die Hinweise auf dem mitgelieferten Qualitätsetikett „Pflege und Wartung“ sorgfältig zu befolgen.

FR_Une sélection exclusive de tissus outdoor premium est disponible pour ces collections. Spécialement choisis pour mettre en valeur le design des produits, ils offrent une excellente résistance aux agents atmosphériques. Tous les tissus proposés sont adaptés à une utilisation en extérieur et présentent une haute résistance aux UV, préservant durablement leurs qualités esthétiques, leur confort et leur fiabilité. Les catégories textiles disponibles comprennent des tissus acryliques ainsi que des solutions en polypropylène, polyester et PVC, associées à des garnissages techniques spécifiquement développés pour l'extérieur. Ces revêtements assurent protection, facilité d'entretien et grand confort. Les catégories les plus techniques offrent une quasi-étanchéité à l'eau. Il est toutefois recommandé d'ouvrir périodiquement les fermetures éclair des coussins afin de favoriser l'aération interne, le séchage et la prévention des moisissures. Les collections Setai et Sunset Harbour sont réalisées avec une structure en contreplaqué marine, sélectionné pour sa stabilité et sa résistance en extérieur. Les assises et dossiers sont composés de mousses polyuréthane à densité différenciée associées à des garnissages thermoliés, garantissant soutien, douceur et durabilité. Les revêtements sont dotés d'un enduit PVC spécial, imperméable, antistatique, antibactérien et antiacariens. Les housses sont entièrement déhoussables, tandis que les coussins libres sont garnis de Rollofill H.53 et protégés par un PVC imperméable et respirant. Le garnissage technique comprend également le Tecnoform HF G450, conçu pour offrir un confort et des performances élevés. La collection Venetian se distingue par une structure en tube métallique traitée par peinture en poudre polyester et époxy, assurant protection et durabilité en extérieur. La base est réalisée en contreplaqué marine, tandis que les coussins d'assise utilisent des mousses polyuréthane de différentes densités, notamment NIR T 25N et NIR T 30C, combinées à une résine thermoliée GR 200. Les coussins libres sont garnis de Rollofill et revêtus d'un PVC imperméable et respirant. La construction est complétée par des éléments antidérapants, des cordes en coton ciré teintées de manière réactive et des revêtements imperméables en PVC. Pour une protection optimale, Roberti recommande l'utilisation de ses housses de protection dédiées, réalisées dans un tissu spécial imperméable en PVC et polyester. Elles protègent les meubles contre les intempéries, la poussière et les impuretés atmosphériques, contribuant à préserver durablement les qualités esthétiques et fonctionnelles des produits. Elles sont disponibles pour une sélection de modèles, comme indiqué dans la liste de prix. Tous les produits de la collection sont exclusivement fabriqués en Italie avec des garnissages d'origine italienne. Afin de garantir une durabilité maximale et de préserver les performances techniques des matériaux, Roberti recommande de suivre attentivement les instructions figurant sur l'étiquette qualité « Entretien et Maintenance » fournie avec chaque meuble.
